Hello All,

Thanks everyone for responding to the doodle poll – we miraculously landed on a meeting time that works for all of us:
Thursday November 8th 3-5pm.

The goal of this meeting will be for EPA to provide a technical update on our work effort, communicating our fish modeling approach and assumptions. We are interested in having a technical discussion following our presentation. We are particularly interested in your perspectives on how fisheries in and around cold water refuges are managed, and how we might be able to best incorporate management options into our model scenarios.

We will follow up soon with a screen sharing link and conference phone line.
